"City as Text: Berlin" is a hands-on course that examines how we navigate large cities. With a focus on Germany’s capital, students will explore key parts of urban landscapes such as transportation, housing, entertainment venues, museums, shopping centers, and historic architecture.

In this seminar-style course, students will also read about and discuss moments in Berlin’s political and cultural history such as the collapse of the Berlin Wall or the wild Weimar years of artistic experimentation. During the Spring Break travel to Berlin, students will have the chance to practice urban navigation and will get to visit many famous monuments, museums, and palaces.

Throughout the trip, from attending an opera classic to savoring innovative ethnic cuisines, students will be challenged to think about how the organization of the city shapes their individual place within it.

**Itinerary**

**March 30:** Depart Atlanta for Berlin, Germany
